[Github](https://github.com/AB216C?tab=repositories): <https://github.com/AB216C?tab=repositories>

Result-Driven Quality Technician with a background in Data analysis and process automation. Passionate about full-stack Software engineering- Skilled in JavaScript, Python, React, Flask, and Java through the Coding Temple bootcamp. Seeking to leverage hands-on project experience building APIs and dynamic UIs to drive business value and efficiency in a developer role.

SKILLS

Languages: JavaScript, Typescript, HTML5, CSS3, Python, Java

Frameworks/Libraries: React, Flask, Bootstrap, SpringBoot

Database: MySQL, PostgreSQL, SQL Lite, MongoDB

Tools/DevOps: Git/ GitHub, RESTful APIs, VS Code, Postman, IntelliJ IDEA

Other: Communication, Time Management, Leadership, problem solving, and Teamwork

PROJECTS

Defeat-Evil Wizard (Python) [<https://github.com/AB216C/Defeat-Wizard-Project.git>]

- Applied Python OOP principles to design and implement an interactive game between the Evil Wizard and its opponents(heroes)
- Engineered a Menu System to control special abilities, attacks, healing, and viewing statistics

Event Center(Bootstrap) [https://github.com/AB216C/EventCenter-Redesign_Bootstrap-Project.git] , [https://ab216c.github.io/EventCenter-Redesign_Bootstrap-Project/]

- Re-designed Event Center project using Bootstrap layouts and components to make a responsive website with added functional features such as sign in, sign up, and buy tickets buttons, and a Slideshow.

Open Trivia Database Quiz app (JavaScript & React) [<https://github.com/AB216C/REACT-Project2-FORMS-and-APIs.git>]

- Used Event Handling and Api Fetch Methods together with forms to create the interactive quiz app, which allows users to try different types of questions ranging from easy to difficult levels.

Full Stack: Marvel Character (Python, SQL, JavaScript, React) [<https://github.com/AB216C/FullStack-ReactProject2-MySQL.git>]

- Created API using MySQL and Flask, and SQLAlchemy, and allowed and used API to manage CRUD operations, including add, view, update, and delete characters.

Student Management System (Java) [<https://github.com/AB216C/Java-Project2-CodingTemple.git>]

- Wrote a Command Line Interface program (CLI) that allows users to manage students' and teachers' records through functionalities mainly adding students/teachers, updating information, viewing details, and managing students' and teachers' courses.

EXPERIENCE

Software Engineer Apprenticeship: Coding Temple | Remote

December 2024-Present

- Programmed HTML, CSS, JavaScript, Bootstrap, and React to develop and maintain user-friendly web applications
- Designed and developed games and CRUD-based programs with Menu Systems using Java, Python, and JavaScript

Quality Technician II &Data Analyst/DHL Supply Chain-Kohler/ DeSoto, Texas

July 2023-Present

- Reduced customer return rate from 30% to 10% by establishing efficient methods to audit products before they are loaded onto trailers (Auditing in real-time).
- Improved the quality of shipped loads by implementing an efficient method to inspect the quality and quantity of loaded products.
- Established a monthly data analysis process to identify the top 5 associates to train based on the highest number of errors made during putaway, picking, staging, and loading products.
- Conducted daily research resulting in actionable insights that reduced customer-reported shortages by 25%, improving overall customer satisfaction.
- Support Upper management in decision-making by creating reports daily and presenting the Quality Team's audit findings from receiving, picking, staging, loading, and customer claims research.

Research Assistant, Food Innovation Center, Lincoln, NE

August 2018-May 2020

- Identified and measured phytic acid content and phytase activity in historical and modern hard winter wheat genotypes, and the results were used for the research in plant breeding and disease management practices. Findings were published in the PLOS ONE Journal.
[Publication-co-author: <https://journals.plos.org/plosone/article?id=10.1371/journal.pone.0247809>]

EDUCATION

Coding Temple-Certificate

December 2024-Present

- Full Stack Software Developer

Dallas Baptist University

August 2021-May 2023

- Master of Science in Supply Chain Management

University of Nebraska-Lincoln

August 2016-May 2020

- B.S. in Integrated Science
